

Student Testimonial for Mark Chavez

3D Modeling Workshop & Introduction to Storyboarding

I had Mark for an introduction class to 3D Modeling and for Storyboarding. He served as an inspiration to the class with his vast knowledge on the subjects– both in showing us what the limits to we could do with the program for 3D modeling, as well as handing down tips to make the workflow easier. He was patient with the slower learners, and made sure that everyone was on the same page for each lesson.

Mark went above and beyond when he went round the labs during finals week, and offered help with his expertise. He made sure that his office doors were always open for people who needed help with animation, regardless of whether it was for the classes he taught or not.

I also had the opportunity to work on a project with Mark for a research workstudy. He was clear in handing out assignments, while allowing free reign to interpret the topic of research. This balance of control from him was very appreciated during my workstudy, and helped me to grow as an artist.

He is a dedicated and encouraging mentor, and I think that NTU should keep him to continue being a mentor for the future students in the School of Art, Design and Media.
